cubo toys

Let's play in so many ways!

cubo toys

Brave. Curious. Inspired.

For every child to thrive in the first five years.

We inspire young families to raise the next generation of children with future and lifelong skills, while minding their impact to the planet. Our toys are uniquely designed to **play for good.**

Our Story

When we had kids, we noticed that most toys can be used only for a short period of time specially when it no longer educates or entertains. We need to buy more toys to edutain them, which piles up our space. We couldn't find alternative toys that can solve both our developmental and storage needs.

Culture-Inspired

Inspired by the Filipino culture's native hut called "kubo", a house that changes based on the family's needs, we designed low impact toys that are modular and multiusable. This allows curation of development-appropriate toys that grows with the child's learning needs.

Our Founder

Karen Villard works in the early years sector as a preschool co-founder, early years educator, play ambassador, and mum of 2 children (3yo and 5yo). She's inspired by her kids to design toys to play for good.

Modular Toys

Our toys are modular or multi-usable in design that grows with the child's learning and developmental needs from babies, toddlers, and preschool years, curated by an early year's professional.

Karen talks about play-based learning and sustainability at:
